

Part 1: Admin User Setup

1. Open Microsoft Admin Center

- Go to: <https://admin.microsoft.com>
- Sign in using **admin email credentials** (not the no-reply account)

2. Go to Active Users and Enable MFA

- From the left sidebar, click **Users > Active Users**
- On the top menu, click **Multi-Factor Authentication**
- Find the user `no-reply@theboxcycle.com`
- Click the user and choose **Enable** under MFA
- After enabling, click the user again and choose **Enforce**

3. Allow App Password Creation

- Go to the same **Multi-Factor Authentication** section
- Click **Service Settings** at the top
- Tick the checkbox:
 - “Allow users to create app passwords to sign in to non-browser apps”

4. Configure Verification Options

Ensure the following options are **enabled** under the same Service Settings:

- Call to phone
- Text message to phone
- Notification through mobile app

- Verification code from mobile app or hardware token

5. Enable Security Defaults via Microsoft Entra

- Visit: <https://entra.microsoft.com>
 - From the left menu, click **Identity > Properties**
 - Click **Manage security defaults** (bottom of the page)
 - Set to **Enabled**, then **Save**
-

Part 2: no-reply@theboxcycle.com User Steps

1. Login to User Security Dashboard

- Go to: <https://mysignins.microsoft.com/security-info>
- Sign in with:
 - Email: no-reply@theboxcycle.com
 - Password: [Tbc@2025](#)

2. Complete MFA Setup

- You will be asked to approve sign-in via the **Microsoft Authenticator** mobile app
- Approve or enter code to proceed

3. Generate App Password

- After login, click **Security Info** in the left sidebar
- Click **Add sign-in method**
- Choose **App Password** from the dropdown

- Enter a name (example: `theboxcycle`) and click **Next**
- Your **App Password** will be displayed
- **Copy and store it securely** — this will be used in Nodemailer or your app
